- realistic animation of the sewer population
- unique computer assisted international game procedures
- ICON based control systems
- 500 smooth scrolling screens
- with complete operating manual

ABOUT THE PROGRAM

Deep in the public London sewers you've got trouble! Your job is to get them cleaned. But you've got help in the shape of an IDPR (Icon Driven Programmable Robot) called FLOYD the DROID, who has been programmed to clean the dirt and slime and mend the cracks and leaks. Rats, Bats, Alligators and Hoodlums are making life difficult for him. He's got to be taught how to deal with the unwanted visitors. Your job is to devise a RAT PROCEDURE for FLOYD to use against the rats and program him with it via your ICON driven control panel. Likewise a BAT PROCEDURE is needed against the bats etc. That's only half the story -you've got to plan the most efficient route for FLOYD or you won't get the job done in time and that could mean you'll be down there with a broom and scrubbing brush!
