Actual Screen Shots

The training was grueling, the competition stiff. But you proved yourself a pilot without equal, ready to command the world's most advanced defensive weapon: Flyer Fox.

Sitting in the cockpit of your sleek jetfighter, you escort a commercial jumbojet through the once-safe international skies. Suddenly your scope lights up and the reason for your presence streaks by. A Mig fighter has ruthlessly opened fire on the helpless airliner. It breaks off and you give chase. You track him on your scope. You veer left. You fire. You veer right. The ground zooms past. He tries to evade, but you doggedly follow, knowing that you must not allow him to complete his mission of destruction. Suddenly you receive a mayday from the airliner — another Mig is attacking. Afterburners, blazing, you streak back to the rescue, in defence of freedom of the skies!

Flyer Fox, a one-player, 3D simulation, is part of Tymac's Game Gems series. Fast arcade action combined with dazzling, high resolution graphics and software generated speech puts you right in the game with an impact you never thought possible!

PRODUCED FOR TYMAC BY GAME GEMS

System Requirements

For use on the Commodore 64 microcomputer with disk drive.
Joystick required.

Design by Gregory Carbonaro Program By Charles Teufert

Graphics and Speech By Gregory Carbonaro

Animation By Ronald C. Pintus and Arthur J. Aspromatis
