Ozi Soft™

From time immemorial man has been puzzled by his dreams. It is said that deep within every dream there lies the secret of the conscious mind. You begin your dream dressed in armour and armed with a sword. You can check the path you take on the chess board map, you encounter objects and pick them up they will be listed on the inventory. If you wish to enter into combat with anyone, or anything, make sure your sword is ready for action by being at the top of your inventory then press the joystick button. Action explodes!
