

H.E.R.O.™

HELICOPTER EMERGENCY
RESCUE OPERATION

BY JOHN VAN RYZIN

ACTIVISION

DO or DIE

Rod Hero works in the Van Ryzin Mine. It's steady work, but you can't be afraid to get your hands a little dirty.

The dynamite charge is set. Stand clear!

In his free time, Rod tinkers in his workshop. Truth told, he's pretty handy.

Then it hits, EARTHQUAKE!

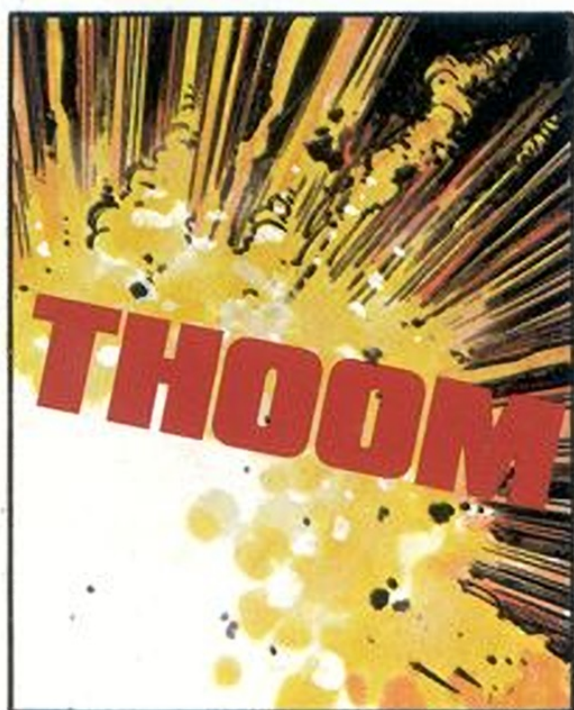

Hardest hit are the mines, where the tremors have raised a lava river. Miners are trapped on every level. They seem doomed.

With some work, I bet a guy could fly this thing solo.

Let's hear it for Rod Hero! Hip-Hip-Hooray...

...you'd have done the same for me...

I don't know if this stuff'll even work — but I know I've gotta give it my best shot.

Oh, No!

It could have been me down there!

Rod knows those mines. Some walls glow red with magma deposits — touch 'em and you're fried! And vermin — they're everywhere!

Shaft bats, springing spiders, mine moths, nesting snakes — all lethal, and all over!

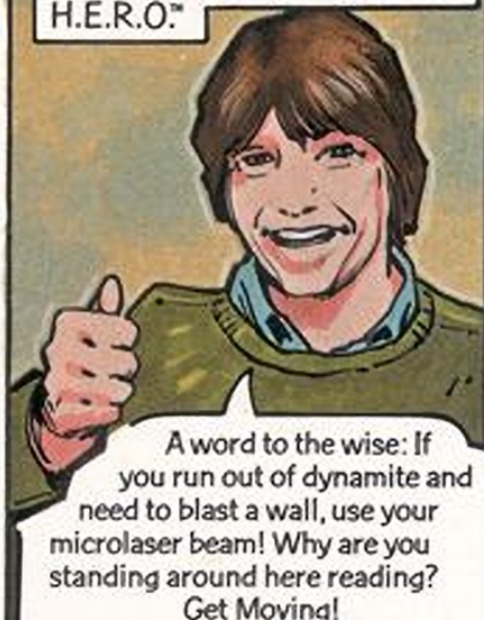

Rod!
What the...?!

Love to chat,
but this tunnel's
gonna blow!

That's how Rod Hero came to found the Order of the H.E.R.O. (Helicopter Emergency Rescue Operation). He's made it his life's work to help wherever he can. See inside for details on how to join!

John Van Ryzin, designer of H.E.R.O.™

A word to the wise: If you run out of dynamite and need to blast a wall, use your microlaser beam! Why are you standing around here reading? Get Moving!

TROUBLE IN THE TUNNELS!

Desperate miners trapped!
Will these tunnels be their tombs?
Rod Hero is their last hope!
His Prop-pack powers him into
the mine shafts—and peril!

Zap crazed creatures!

Demolish
dead-ends
with
dynamite!

Lethal challenges on all
sides—vile vermin...bubbling
lava rivers...molten magma
deposits...trailing tentacles...
crushing walls!

Time eats away at power and ammo!
Make your move!
