

Top secret documents locked away in a Russian safe give the Soviets the power to destroy the world. The only way to preserve world peace is to remove the papers, using remote-controlled droids to penetrate the Russian base. And the CIA have hired you to do the job.

HACKER II

The Doomsday Papers

It's not often the CIA approaches a civilian, offers him immunity from prosecution and opens up its internal facilities to the new recruit. But you have a serious reputation as a Hacker, a reputation that made you rich and nearly landed you with a long stretch in Sing Sing. Now that reputation is being put to the test. . .

CONTROLLING THE MRUs

The CIA comms link patches your computer into a Multi Function Switching Matrix (MFSM) – which is a control panel, linked into the security system of the Russian base. Consisting of four monitors and a keypad, the MFSM allows you to tamper with the video security system of the Russian base, control the droids and scan a droid's immediate vicinity.

The following extract from a Top Secret CIA manual explains how everything works. . .

LOADING INSTRUCTIONS

Hold down SHIFT key and press RUN/STOP. Press PLAY on tape. Program will load and run.

Keypad Control Panels

Phnordman Video Matrix
