

TEMPTATION.

To stumble into
somebody else's
computer system.

To be some-
place you're
really not sup-
posed to be.

And to get the

get to start with.
That's it. From
there, it's up to you.

If you're clever
enough and
smart enough,
you could

discover a world

HACKER™

strange feeling
that it really does
matter. "LOGON
PLEASE:" is all you

you've never
before experienced
on your computer.
Very tempting.

By Steve Cartwright

ACTIVISION
HOME COMPUTER SOFTWARE™

YET ANOTHER TEMPTATION.

HACKER HINTS

It's about the instructions for Hacker. There aren't any. (After all, if you really accidentally stumble into someone else's computer system, no one will be there to help you.)

If you get really stuck, we can provide a set of "Hacker Hints." (Details on enclosed card.) However, this is a temptation you should resist, if you can.

LOGON PLEASE:

What's going on here? Who are these guys? What are they doing? What am I doing?

In Hacker, it's up to you to figure it out. We can't tell you. We won't tell you. As every hacker knows, there just aren't any instructions for this kind of thing.
