

HACKER™

It's late and you've spent the night working electronic bulletin boards with your computer.

You're ready to quit but decide to call up just one more. Being tired, you accidentally call the wrong number and, before you can hang up, your computer screen turns blue.

The words "Logon please" appear.

What do you do now? You don't know the password. You don't even know what computer system you've hacked into. But you do know you want to find out more.

How? You've found your way in. Now find your way out.
