HEAVENBOUND

Playing the Game...

Elfantania is the mythical place where all those mysterious pink elephants come from that seem only to appear during over consumption of the old amber nectar, but that's just the way they want you to think because they all love to be troublesome pranksters and lead you to believe you're going bonkers, and it is a strict rule that no elephant let themselves be seen in any other situation, but a certain T-Fant has decided to break this rule to follow his life long dream to determine the existence of heaven.

You must guide T-Fant on his mission to reach the Purley gates of heaven helping him to avoid all those nasty cloud demons and creepy creatures that exist on the plane between heaven and earth. There are certain bonuses that you can pick-up on your mission such as increased shot-

power for T-Fant, and extended time for you to make it to heaven - so don't feel blue 'cos pink is cool!

Controls...

Play the game using joystick in Port 2.

To go left.....Joystick left

To go right.....Joystick right
