

HIGH FRONTIER

An SDI Wargame

The most controversial defence policy this decade, known variously as SDI, Star Wars or Reagan's Ray Guns, the Strategic Defence Initiative is either hailed as mankind's salvation or damned as an unworkable provocation. In **HIGH FRONTIER** you are the project leader committing staff and funds to make SDI a reality. You deploy the satellite defence system as the world teeters on the brink of nuclear oblivion, and you must make the decisions that could save the American mainland...or devastate it.

A joystick-controlled, icon driven strategic simulation that's hopefully as near as you'll ever get to the real thing...or is it?
