SCREEN DISPLAY

Using the unique "Bastavision", you can see each room from every angle. The screen is split in two. Follow your direction using the top section. Press 1 to rotate the view in the top window. The lower section allows you to watch the activity from another angle, it also displays text, press 2 to rotate this view.

There are other things to help you:

WEEEOMETER – when you hit the top of the scale you'd better go pretty soon!

DRUNKOMETER – you'll have to control this very carefully by drinking booze or black coffee – which you will find in unlimited supply. Some BASTARDLY activities can only be carried out when you are stone cold sober but you'll need to be at the pickled newt stage for others.

FARTOMETER – eating builds up your fart power (especially yummy curries). Press F when you want to release a truly fruity raspberry.

SMELLOMETER – keep this as high as possible for maximum offence for true BASTARDS have a noxious body odour.

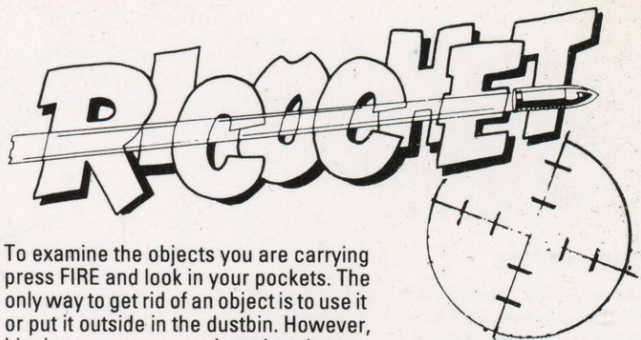

COMPLETE-BASTARD shows at the bottom of the screen and to win you must illuminate all sixteen characters at the same time. But remember, less BASTARDLY deeds will result in a letter lighting up only for a short time.

TO PLAY

Find objects (you can only carry two at any one time) by searching everywhere. To search, get close to an object and turn to face it while continuing to push in that direction with the joystick or keys, press FIRE. UP and DOWN allow you to select an option, FIRE to choose. Select further options this way and FIRE when you've finished.

To corner a guest you must rudely bump into them and block their way! Make sure you are in line with them and at the same level in the room. Use the lower section of the screen to help you track them down. Push or key towards them and press FIRE. A successful encounter will reveal their name and possible options.
