

# CASSETTE LOADING INSTRUCTIONS

# IMPOSSIBLE MISSION™

This cassette contains a fast load programme that reduces the loading time to about 3½ minutes.

Switch the computer off and remove any cartridges. Connect a joystick (Port 2) and a C2N Datassette Unit. Switch on, and put cassette in the player with its tape at the left and fully rewound.

Hold down SHIFT and press RUN STOP whilst continuing to hold SHIFT down. Start the Datassette Unit.

The computer will reply SEARCHING, then FOUND IM and will start to load the game in 5 sections. Press the SPACE bar after each section.  
The game will start automatically after the last section has loaded.

*If loading difficulties are experienced, check that the Datassette Unit read/write head is clean and demagnetised as described in the Operating Instructions. Switch the computer off and on every time the game is reloaded.*

# DISK LOADING INSTRUCTIONS

# IMPOSSIBLE MISSION™

Switch the computer off. Connect a disk-drive and joystick (port 2). Switch disk-drive on, then switch the computer on. Adjust the loudspeaker volume to about half-way.

Insert the disk, label upwards and type:-

LOAD “\*,” 8, 1 then press RETURN.

The computer will reply:  
SEARCHING FOR “\*”  
LOADING.

The title display will come up, and loading continues for about 2½ minutes. The game will start automatically when loading is complete.

Follow the instructions given in the booklet for playing the game.
