Bubble, bubble, toil and trouble . . .

MACBETH . . . hero or villain? It's the central conflict behind one of the most famous plays ever written. Was Macbeth a hero trapped in a predestined web beyond his ken, or the evil usurper brought down by the forces of justice? Unarguably the most famous playwright in all of literature, William Shakespeare, late of the Globe Theatre in London, is now appearing on your home computer in MACBETH. Justifiably an excellent play, Macbeth has complex, colorful characters plus rebels and kings, murder and treachery, justice and high tragedy.

Four separate text adventures, two with graphics, each cover a different part of the play. From the young Macbeth, who must find a way to suppress the rebels in the service of his king and bring his name renown, to the murderous tyrant trapped in his fiery castle with MacDuff on his trail, who must rewrite the ending before Shakespeare does!

Intertwined are two more adventures as you help the three witches assemble their evil brew ("Bubble, bubble, toil and trouble") and (as Lady Macbeth) prepare her castle for the arrival of the king, and determine how to murder him in his bed!

But that is not all! Each segment has a psychological program in which Will and you dive into the minds of Lord and Lady Macbeth, determining what motivated them into regicide and rebellion!

Accompanying it all is our usual top-quality documentation with easy-to-learn rules, the entire play from the 1623 First Folio, and extensive articles on the play, its history and interpretations of characters. A feast that makes Macbeth an entertaining and educational pastime.
