

MAGNETRON

SCREEN SHOTS FROM SPECTRUM VERSION

- KLP-2 is back!**
 This smart little droid has teleported into one of the satellites in an attempt to shut down the reactors which power the massive destructor beam weapons of the planet Quarteck and which are now trained on Earth.
 With his improved grappling system, KLP-2 must
- battle with enemy droids
 - try to crack the logic sequences of hostile inhabitants
 - utilise spare parts to re-build clones of himself
 - improve his weaponry and systems
 - recharge his power cells.

If anydroid can do it, KLP-2 can!
