MAINFRAME™

TriComplex III was designed to run all the computers of the world insuring peace and tranquility for all mankind. However, something's gone seriously wrong. Having access to all the data the human race has accumulated, TriComplex III sees man as a threat to it's existence and seeks to destroy mankind. Yet, there is some hope! ORBITER, a secret experimental space station has not yet been interfaced with TriComplex III. So with the help of ORBITER it's up to you to avoid the obstacles that TriComplex III has dispatched and

shut it down. You are the only hope to save the world from total domination.

MainFrame is an action filled arcade style adventure game that tests your every skill. You continuously battle droids and secret weapons as TriComplex III tries to destroy you and prevent your attempts to shut it down.

As you battle your way through MainFrame, you will enjoy superb graphics, smooth scrolling animation, gripping music and realistic sound effects.

Entering the cave for exploration

Flying with the air unit

Destroying a building in search of hidden items

Orbiter control panel

Exploring an underground cave

Search and destroy in your land unit
