PRESENTS

TENNIS

FOR ONE OR TWO PLAYERS

Challenge a friend or match your reflexes against our very tough computer pro. Here's video tennis that looks, sounds and plays like the real thing.

Lay down drop shots, rally from the baseline, or attack your opponent with cross court volleys. You can even sharply angle your serves to finish your way to victory. And just like real tennis, "Bounce", "Ad In" and "Ad Out" are all part of the game.

Practice in slow motion or go all out at full speed. Either way, Tennis by IMAGIC™ is a terrific challenge for tennis buffs and loads of fun for all game fans.

TENNIS

INSTRUCTIONS

GETTING STARTED:

- With power OFF, insert cartridge into your computer.
- Turn power ON.
- Plug a Joystick Controller into PORT 2. When playing with a friend, plug another Controller into PORT 1.
- Press any key to get SELECTION MENU.
- Use Port 2 Joystick Controller, to scroll up and down to choose:

NOVICE
AMATEUR
PRO

Use same Joystick Controller to move Left to Right to choose number of players.

- Press FIRING BUTTON or RETURN to start game.
- Use Joystick to move player around and firing button to hit ball.

Please note that TENNIS has a facility that allows you to write your name on the scoreboard, however, it does not work on all model computers. This does not affect the overall operation of the game.
