It's the year 2033. Your name is Tex Murphy, private investigator in San Francisco. You've been hired by the beautiful daughter of a university professor to uncover the facts about her father's death.

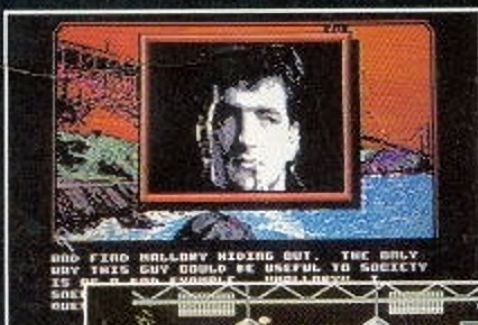

As you begin your investigation, you uncover the deaths of several prominent members of the scientific community. Are these deaths coincidental or is there something more sinister going on? And which characters could have a motive? Could it be J. Saint Gideon, former head of British Intelligence? Could Frank Schimming, president of the largest surveillance company in the world be hiding something? Or what about Sylvia, the professor's daughter. Is she as innocent as she seems? And why is an infamous Detroit hit man in town?

You'll interact with more than 27 digitized characters who respond to questions, bribes and threats.

You'll rummage through offices, warehouses and factories looking for clues. With our innovative "tree" system, you can search without typing.

The Videophone inside your speeder can be used to contact your secretary and informant; the information they provide could help you crack the case.
