

NOVAGEN**MERCENARY**

by PAUL WOAKES

THE SECOND CITY

You have explored Targ Central City and visited the Colony Craft. You have chosen the action in plotting your escape. Congratulations! Now here's the toughest challenge yet.

Load 'Mercenary—Escape from Targ' as usual, but then load in this Dataset under the usual instruction for loading a previously saved gameplay.

You're in Second City! Here every trick in the book has been used in a conspiracy to hinder your escape. The Second City Colony Craft and the planet surface, though different, should not present major problems, but below ground; a new degree of complexity. No hints, no clues, all records are destroyed. You're on your own.

GOOD LUCK!
