MS : Mega Solar Cell	SD : Shield Display Indicator
ED : Emergency Demat Unit	CP : Charge Proximity Indicator

Morpheus Systems

Refer to front of card for system description.
Refer to manual for system specifications.

The Morpheus Menu

Move up and down to change between your options back at base. When you have selected the option you require, use left and right to select the item that you require.

Energy Aquisition & Usage

The main energy bank can receive energy from IC or SC systems. BA systems can increase the storage levels of your main energy bank.

Shield Protection

Energy from the main energy bank feeds your Shield Replenishers which in turn feed your Shield Generators to protect your ship.

Weapons

As weaponry improves, more directions of fire become available to the Morpheus pilot.

Remote Drones

Remote Drones enable the pilot to leave his ship for a short time and fly a much more manoeuvrable craft.
