NEW YORK CITY

Requires joysticks.

You planned for this vacation for a long time. It's your first time to the "Big Apple" and you don't know what to expect when you drive over the bridge. Well buddy, you're about to find out:

All the stories you've heard are true—and then some. First there's the traffic...

Bravely you park your car and venture, on foot, into Grant's Tomb—the first landmark you decided to visit. "Just like in the guide book," you say to yourself, "this is going to be a lot of fun." Then you step outside, just in time to see your car disappear around the block at the business end of a tow truck.

You finally find out where to retrieve it. Just a few subway stops away. You mutter, trying to cheer yourself up. And then you enter the subway station... The sight that greets you stops you dead in your tracks. And so far the day has just begun.

New York City captures all the metropolitan madness you've ever dreamed of, as you explore the Empire State Building, Central Park, the automat, and all the other sights and sounds of Manhattan, as only a tourist can.

Remember, just when you think it can't get any worse in New York City, it will!
