

MASTERTRONIC

COMMODORE · 64 · 128 · COMMODORE · 64 · 128

A fast and furious rally through the forests of central Europe. Foot to the floor, skidding round the bends, you must reach the check point in time.

Through the gears power past the stragglers, the timer is flashing, just seconds left. The checkpoint is only a bend away, will you make it or will it be curtains!

You take part in a night time rally through the pine forests of central Europe. The organisers have decided that there are far too many competitors in the rally, so they have fitted all the cars with explosives. These are set on a short time limit, if you do not reach the check point in time the bomb will go off, and your race will end. You did want to be cremated, didn't you? The only way to avoid this fate is to keep your foot to the floor, avoid the other cars on the track and keep racing.

You will need to make use of the gears, keep your eye on the control panel at the bottom of the screen and whenever the rev counter reaches maximum change up a gear, the gear you are in is indicated on the gear lever in the middle of the control panel. Time counts down on the clock on the left of the control panel, when the red quadrant starts flashing the clock is on its last revolution and you must make the line quickly.

A stage map has been provided at the far left of the control panel, keep an eye on this to get advance warning of the upcoming bends. Avoid the curbs at the side of the track as riding over this slows you down, as does colliding with the other cars in the rally.

You score points for the distance you cover, and a bonus for the time remaining at the end of each stage. At the start of each stage a computer controlled car starts alongside you, if you beat it to the finish you will be awarded an extra bonus.

LOADING INSTRUCTIONS

Hold down SHIFT key and press RUN/STOP.

CONTROLS

- Joystick in Port 2 only
- Fire to accelerate
- Down to change up a gear
- Up to change down a gear
