NIGHT DAWN

Gerade ein Robotronic-Ingenieur und schon sitzt Du im Kontroll-Raum eines Raumers der IRC und steuerst deren Roboter zur Erkundung fremder Welten. Während Du im Orbit um den Kunstplaneten Nightdawn kreist, testest Du zuerst ein älteres Modell, den "Q.E.2", indem Du ihn ferngesteuert durch fünf Testlevel von Nightdawn jagst. Danach erst bekommst Du ein High-Tech Spitzenprodukt unter Deine Fittiche. Dann wirst Du den neuen "Explorer ND-1" unter härtesten Testbedingungen prüfen!

You've just graduated as a robotronics engineer, and there you are in the Control Room of one of "I.R.C.'s" space freighters, with a remote controlled robot to do your planetary exploration for you, while you cruise over that artificial planet - Nightdawn. For starters you get a "Q.E.2", an old model but once you've proved your skill on all five test levels, you get the latest thing in high-tech robots under your fingers. The "Explorer ND-1", and its all yours to test run over the toughest terrain this side of the galaxy.
