Also Color Monitor

NINJA

Ninja! The most fearsome warrior in history, now faces the ultimate test in the Palace of Death. He must prove his worth to the Princess of the Orient by recovering her priceless idols from the grip of the evil one.

As well as fists of thunder and feet of iron, honed through the long years of apprenticeship to a deadly cutting edge, Ninja is granted the use of traditional weaponry: Samurai sword, spinning death-stars and a lethal throwing dagger effective from great range if hurled with accuracy.

Ranged against him will be hordes of paid thugs and criminals and - most terrifying of all - evil Ninja's lured away from the side of justice to fight for the forces of darkness! Equal in skill to himself they will provide the sternest possible test of his courage and determination to succeed.

As he rises up through the level of the Palace, his opponents multiply and their strength increases. Little by little he weakens.

One mistake now and death is certain to follow swiftly! He must fight to the end to return with the seven idols and victory!

Are you good enough to take the test of Ninja and come out on top? Find out in this all action, high resolution, multi-move martial arts game. It's the best around.
