One player should plug a joystick into Port 1 of the Commodore.

Playing Surfaces

Grass - Very fast, balls tend to skip and speed up on impact.

Hard Court - Balls bounce predictably on this surface.

Clay - The slowest of the surfaces; Balls tend to slow down and bounce high on impact.

Serving: Players always serve from the nearest court. Use the joystick to control your serve. A double fault will result in the loss of a point.

Rallying: The computer automatically moves you into position so that you can concentrate on your shot. Press FIRE or move the joystick when the ball's shadow (near-side) gets near the player's feet, or just after it bounces (far-side). The timing of the swing will determine the direction of the ball.

Smashing: If your opponent lobs the ball, you have no alternative but to smash it back. You must move the joystick just before the ball's shadow reaches the player's feet.

Scoring: Because the game is a replica of real tennis, the scoring is also the same.
