"Orc Attack! Orc Attack!" the cry rings out as once more your castle stronghold is attacked by the fearsome hordes of marauding Orcs. Rocks and boiling oil are your weapons against their attempts to scale your battlements. But this time  their numbers are huge and, with the  evil spirits on their side, they have brought along their champions - the Demon Trolls and Ninja Orcs. Can you hold out in this high speed, joystick controlled, scene of mayhem and murder?

## ORC ATTACK

**PROTECT YOUR CASTLE  
AGAINST MARAUDING ORCS**

### LOADING

Press **SHIFT** and **RUN/STOP** simultaneously

### GETTING STARTED

Use the Function keys to set number of players and playing level, then press **F5** to begin. Pressing **F7** during the game takes you back to the title screen.

### PLAYING

Your task is the defence of your castle against the fearsome hordes of marauding Orcs. They have your castle under siege and will try to scale the battlements, but you have stores of rocks and boiling oil to hurl down at them. You have the advantage of a superior position, but they have overwhelming numbers!

Move left and right to pick up rocks or boiling oil from the ends of the battlements. Find an open space in the battlements, then press **FIRE** to drop your rock or boiling oil. Boiling oil takes longer to get, and time is precious. If any Orc manages to get to the top, he will try to stab you with his dagger. You must press your **FIRE** button to use your sword on him. It may take a few blows to kill him. You can kill him with one blow if you pull the joystick towards you at the same time, but you are limited to only a few of these super-blows. Any Orc that reaches the top of his ladder has a better chance of stabbing you if your finger is on the **FIRE** button. The longer he stays there the more powerful he becomes and may be able to injure you wherever you are, so don't delay your attack!

You can press the **FIRE** button to slow down and aim accurately as you run along the battlements. Beware of the Ninja Orcs who can climb without ladders, and are impervious to rocks! If you get the time to pour the boiling oil over the attacking Orcs, all the Orcs in that assault will be wiped out and a pyramid of dead Orcs will form at the bottom according to the number of Orcs slain. You then get a bonus score and the next attack will begin.

The difficulty increases as extra Orc allies join in. You have only two lives, in which you can only suffer a certain amount of wounds, indicated by the counter at the top of the screen. Extra lives are given at 20, 50, 100 and 250 Thousand points. Also, performing a major act of heroism will give an extra life. These are the killing of spirits, killing a Sorcerer, hitting two Stone Warts with one rock, or completing the body count pyramid.
