HUNGRY PAC-MAN VS. THE GOBBLING GOBLINS

THE THRILL OF THE ARCADE GAME

The refinements of dot chomping lead to high scores as hungry Pac-Man avoids ambush by voracious goblins. When Pac-Man gulps an energy dot he can turn the tables and eat everything in sight...that includes yummy bonus nuggets, sending scores into the thousands. But goblins won't allow themselves to be gobbled for long; and soon become their old selves, fast and sneaky, to try to put an end to Pac-Man's three lives.

The world's most popular video games can be yours to play at home, now that Atari makes them for the Commodore 64. And the possibilities don't stop there. More compatible software will be available soon from ATARISOFT, including educational, management and productivity programs.
