

"FAST LOADING" CARTRIDGE USERS:

This program has its own "fast load" system to minimize loading time. The presence of any type of fast load cartridge will not accelerate loading any further. Due to the program's intricate design, the program may not load with certain fast load cartridges attached to your computer. If you use a fast load cartridge and experience problems loading the program, turn off the computer and disk drive, remove the disk from the disk drive, remove the fast load cartridge, and then follow the enclosed instructions to load the program. With no cartridge attached, the program should load normally.
