PHANTOM
of the
ASTEROIDS

COMMODORE 64

The earth is under threat from an asteroid hurtling towards it. You have been sent to the asteroid to destroy it and save the earth from invasion by a swarm of bloodthirsty phantoms.

MANUFACTURED IN THE U.K.

The Screen Displays

The Aim of the Game

The earth is under threat from an asteroid hurtling towards it.
Your mission is to destroy the asteroid and save the earth from invasion by a swarm of bloodthirsty Phantoms.

To destroy the asteroid you must find and collect the 36 Uranium cubes on it. When these are gathered together in one place you will have 5 minutes (real time) to reach the teleport and escape before the nuclear explosion will blow up the asteroid.

There are 3 types of force wall which will bar your way. The cyan, purple and green force walls are all of varying strengths but contact with any of them will result in instant death! Each type can be deactivated for a different period of time by standing on their respective control pads.

Other hazards to avoid include the Phantoms who will slowly drain your energy and poisonous plants.

To replenish your energy and oxygen stores you must find and stand on the supplies which are scattered all over the asteroid.

Your mission is highly dangerous but not impossible!
GOOD LUCK!!

CONTROLS

Joystick only

TO START:

Hit space bar to start at the beginning. Or hit the fire button to start from last saved or loaded game position. Hit 'L' to load previously saved game then press fire button*

DURING GAME: The space bar will pause game. You can save the game position when the game is paused by hitting 'S'. Hit space bar to restart.

*When loading a previously saved game position you can skip over old copies of saved games by hitting the space bar. Hit the Commodore key to load the one you want when you get to it.
