PIT STOPTM

Cartridge for
COMMODORE 64

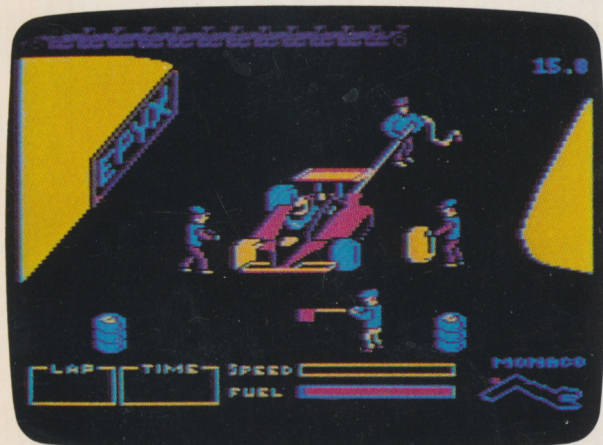

PIT STOP™

At breakneck speed you steer your race car around the track. But that's only half the challenge, because in the pits it's a race against the clock using your joystick to control the pit crew.

Plan your race strategy carefully, the faster you go the more fuel you will burn and the quicker your tires will wear. Should you stay on the track or head for the pits? The decision is yours. Remember in the pits it's a race against the clock to gas up, change tires and get back on the track.

This isn't just another race game, it's like the real thing. Pit Stop, the first race game where the race is won or lost in the pits.

- Three Race Circuits
- Six Different Track Configurations
- Three Skill Levels
Rookie, Semi-Pro, or Pro
- Track Overview
- Arcade Quality Graphics & Sound
- Joystick Controlled
- One to Four Players

RATING:

EPYX CODING

To help you choose the game that's right for you, EPYX games are coded to indicate the degree of emphasis on "Action," "Strategy" or "Learning." These symbols will appear on the front of all EPYX packages:

Action

Strategy

Learning
