

POSEIDON
PLANET ELEVEN

FEBRUARY 10th 4956—NOW
You, an underworld researcher and scientist, have been asked to travel beneath the planet surface, find eight crystals and take them to the core where they will react causing the planet to cool. You accept.

SCREEN SHOTS FROM CBM 64 VERSION.

POSEIDON—Planet Eleven

JANUARY 18th 2071—The first manned spacecraft successfully lands on Mars. In the following decade the American Space Programme expands dramatically. Probes are sent to the ten planets in our galaxy providing useful information.

By the 23rd century the Earth's surface is too dangerous to live on. The deterioration of the Ozone layer has caused nearly every country to be declared a danger area. Underground and domed cities are becoming overcrowded.

JULY 18th 2327—"Voyager VI" discovers a new planet outside our galaxy. It is named "POSEIDON", the eleventh planet. Probes are sent and it is found to have a similar atmosphere to Earth.

MARCH 28th 2329—The manned Chinese spacecraft "TSE III" lands successfully on the planet "POSEIDON". Atmosphere readings show the air to be 97% clearer than Earth at the present time. The first human breathes for over twenty minutes with no oxygen, apparatus or space suit.

POSEIDON is declared fit for human habitation.

JULY 10th 2330—The first shuttle is launched carrying 4180 people including the flight crew.

OCTOBER 26th 2372—Over the next 42 years 17.5 million shuttle launches are recorded. The last shuttle lands on POSEIDON making the population 7900m.

NOVEMBER 4949—The Earth's atmosphere has collapsed. The surface temperature is 215 degrees celsius. Earth is now officially a dead planet.

FEBRUARY 8th 4956—POSEIDON's underground pollution levels are reported to be high and causing damage to the planet core and structure.

FEBRUARY 9th 4956—The report is confirmed. Researchers find parts of the core to be low in Crystalyte. The planet is over-heating from the inside out. Scientists predict the planet structure will collapse causing an implosion followed by a massive explosion destroying the planet.

You, an underworld researcher and scientist, have been asked to travel beneath the planet surface, find eight crystals and take them to the core where they will react causing the planet to cool.

You accept.

FEBRUARY 10th 4956—NOW.

Hi-TEC SOFTWARE
PRESENTS

A Series of Games Based on Famous
Hanna-Barbera
Cartoon Characters

HONG KONG PHOOEY

YOGI'S GREAT ESCAPE

RUFF and REDDY

"ATOM ANT"

COMING SOON
KINDLE-ANTHONY ONLY 19.95

299

**A FANTASTIC SERIES OF NEW AND ORIGINAL
GAMES BASED ON THE FAMOUS HANNA
BARBERA CARTOON CHARACTERS BROUGHT
TO YOU BY HI-TEC SOFTWARE**

**Yogi's
GREAT ESCAPE**

**BEST BUDGET
GAME OF THE MONTH**

AVAILABLE ON:
SPECTRUM, C64, AMSTRAD CPC, ATARI
XE/XL (8 BIT MACHINES) ATARI ST & AMIGA

The fun begins when Yogi and Boo Boo wake up from their long winter's nap and find out that their beloved home Jellystone Park must close, and that all of the bears will be sent to a zoo. Yogi cannot bear the thought of being cooped up, and so he and Boo Boo must make their escape.

**HONG KONG
PHOOEY**

AVAILABLE ON:
SPECTRUM, C64, AMSTRAD CPC, ATARI
XE/XL (8 BIT MACHINES) ATARI ST & AMIGA

Baron Von Bankjob has escaped from jail! Who comes to the rescue? It's Hong Kong Phooey, emerging from the sticky top drawer of his special file cabinet, with the help of trusty police cat, Spot. The latest living legend of our time emerges, mask and kimono askew, the indispensable Kung Fu manual tucked firmly inside his pocket.

**RUFF
and
REDDY**

AVAILABLE ON:
SPECTRUM, C64, AMSTRAD CPC, ATARI
XE/XL (8 BIT MACHINES) ATARI ST & AMIGA

Ruff and Reddy have agreed to test Professor Flipnoodles Pocket Rocket for him. This blasted off but something went wrong and the rocket went out of control leading them out into deep space. The rocket crash landed on an alien world inhabited by aliens called Lilli-Punies, who are small, blue, but very very wary of their visitors. In fact they capture Reddy and tell Ruff that he can get his friend back when he rescues their trapped alien friends.

"ATOM
ANT"

AVAILABLE ON:
SPECTRUM, C64, AMSTRAD CPC,
ATARI XE/XL (8 BIT MACHINES)

© HANNA BARBERA PRODUCTIONS INC.

YOUR OBJECTIVE

To collect 8 crystals and take them to the planet core, thus ensuring the safety of Poseidon.

AREAS TO EXPLORE

- Grass/Mud
- Crystal
- Concrete/Radiation
- Molecular
- Rocks/Caves

Shooting in a gas-filled room causes death to all inside. Radiation causes energy loss.

E = Energy Bar

F = Booster Fuel Bar — Collect fuel packs for Booster Fuel. More fuel = more consecutive jumps max 5.

T = Temperature Bar. If the temperature reaches the top, the game is over.

Weapons — Fire = Laser

Fire pressed for 1 second = Ground Seeker.

INSTRUCTIONS C64

Joystick Port II.

Run stop = Pause

While Paused Q = Quit

POSEIDON — PLANET ELF

Ende des 23. Jahrhunderts wird die Oberfläche der Erde zu gefährlich sein, um darauf zu leben (verursacht durch die Abschwächung der Ozonschicht).

18 JULI 2327 — "Voyager VI" entdeckt einen neuen Planeten außerhalb unseres Milchstraßensystems. Er heißt "POSEIDON", der elfte Planet. Sonden werden ausgeschickt und man findet, daß die Atmosphäre ähnlich der Erdatmosphäre ist.

28 MARZ 2329 — Des bemannte chinesische Raumschiff "TSE III" landet erfolgreich auf dem Planeten "POSEIDON".

POSEIDON wird als "für menschliches Leben geeignet" erklärt.

26 OKTOBER 2372 — Während der nächsten 42 Jahre werden 17.5 Millionen Raumtransporterflüge verzeichnet. Der letzte Raumtransporterflug landet auf POSEIDON, wodurch die Bevölkerung auf 7900 Mio ansteigt.

8 FEBRUAR 4956 — Es wird berichtet, daß die Verschmutzung unter der Oberfläche sehr angestiegen ist, wodurch Schaden am Kern und an der Struktur des Planeten verursacht wird.

9 FEBRUAR 4956 — Forscher entdecken, daß Teile des Kerns einen sehr niedrigen Kristallitgehalt haben. Der Planet heizt sich von innen auf. Wissenschaftler sagen voraus, daß die Planetstruktur zusammenfallen wird und eine Implosion, gefolgt von einer riesigen Explosion, die den Planeten zerstören wird, verursachen wird.

Sie, ein Unterweltforscher und Wissenschaftler, sind gebeten worden, unter die Planetoberfläche zu fahren, acht Kristalle zu finden und sie zum Kern zu bringen, wo sie reagieren werden und die Abkühlung des Planeten verursachen werden.

Sie übernehmen die Aufgabe.

10 FEBRUAR 4956 — JETZT.

ZU ERFORSCHENDE GEBIETE:

- Gras/Matsch
- Kristall
- Molekular
- Beton/Strahlung
- Felsen/Höhlen

Das Schießen in einem gasgefüllten Raum verursacht den Tod von aller Anwesenden.

Strahlung verursacht Energieverlust.

E = Energieanzeige

F = Extrabrennstoffanzeige — Sammeln Sie

Extrabrennstoffpakete.

Mehr Brennstoff = mehr aufeinanderfolgende Sprünge, höchstens 5.

T = Temperaturanzeige. Wenn die Temperatur die Spitze erreicht, ist das Spiel vorbei. Waffen — Feuer = Laser

Feuer, 1 Sekunde lang gedrückt = Bodensucher.

LADEN

SHIFT/RUN STOP gleichzeitig drücken.

SteuerKnüppel, Ausgang 2.

STEUERUNG

RUN/STOP — Spielpause

Spielpause Q — Quit

POSEIDON — Pianeta Undsici

Nel 23esimo secolo la superficie della Terra è troppo pericolosa per viverci (la causa è il deterioramento dello strato d'Ozono).

LUGLIO 18 2327 — Il "Voyager VI" scopre un nuovo pianeta all'esterno della nostra galassia. Viene chiamato "POSEIDON", l'undicesimo pianeta. Vengono spedite delle sonde e si riscontra che il pianeta ha un'atmosfera simile a quella della Terra.

MARZO 28 2329 — La nave spaziale cinese con uomini a bordo "TSE III" atterra con successo sul pianeta "POSEIDON".

Si dichiara che POSEIDON è adatto all'abitazione umana.

OTTOBRE 26 2372 — Durante i seguenti 42 anni 17.5 milioni di lanci di shuttle vengono registrati. L'ultimo shuttle atterra su POSEIDON, aumentandone la popolazione a 7900 milioni.

FEBBRAIO 8 4956 — I livelli d'inquinamento sotterraneo di POSEIDON sono molto alti e stanno causando danni al nucleo del pianeta e alla sua struttura.

FEBBRAIO 9 4956 — I ricercatori riscontrano che parti del nucleo sono

carenti in Crystalyte. Il pianeta si sta surriscaldando dall'interno verso l'esterno. Gli scienziati prevedono che la struttura del pianeta si frantumerà causando un'implosione seguita da un'enorme esplosione che distruggerà il pianeta.

Voi siete un ricercatore e scienziato del sottosuolo e dovete viaggiare sotto la superficie del pianeta, trovare otto cristalli e portarli verso il nucleo dove reagiranno causando il raffreddamento del pianeta.

Accettate.

FEBBRAIO 10 4956 — ORA.

Se separate in una sala piena di gas, tutti coloro che vi si trovano dentro moriranno. La radiazione causa perdita d'energia.

E = Barra Energia

F = Barra Carburante Ausiliario — Raccogliete i contenitori di carburante per il Carburante Ausiliario. Più carburante = più salti consecutivi, Max 5.

T = Barra Temperatura. Se la temperatura raggiunge il massimo, il gioco termina. Armi — Fire = Laser.

Se premete Fire per un secondo = Ricercatore sul Terreno.

ISTRUZIONI DI CARICAMENTO

Premete i tasti SHIFT & RUN/STOP insieme.

Adoperate il Joystick Porto 2.

RUN/STOP — Pausa

Pausa Q — Quit

ARRE DA ESPLORARE:

- Erba/Fango
- Cristallo
- Molecolare
- Cemento/Radiazione
- Rocce/Caverne
