

HEAT WAVE

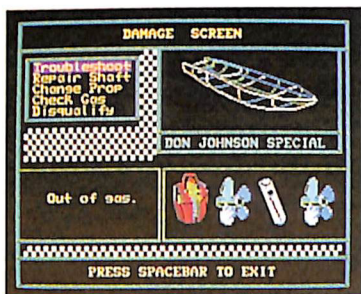

OFFSHORE SUPERBOAT RACING

ACCOLADE

Supports: Commodore 64/128
1541/1541C/1571
Disk Drive
Requires: 64K Memory

RACE A \$230,000 SUPERBOAT. How do the rich and famous blow off steam? Racing seven-ton, 41-foot monsters. Computer designed. Hulls 38 times stronger than steel. This baby can cruise near 100 mph and her V-12 turboprops can puree the ocean like a blender.

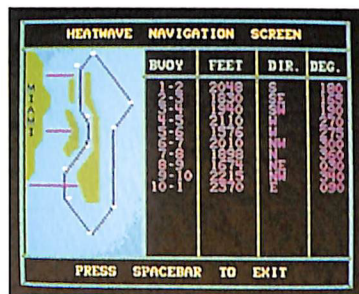

PERFORM ON-BOARD REPAIRS VIA THE PIT SCREEN. It's mid-race. You've blown a prop. And the pit crew is six miles away on a dock. What to do? Call up the high-tech Pit Screen. Inspect your ship from stem to stern, make repairs, then get the hull outa' there.

BRING THE OCEAN TO A BOIL.

They rumble like thunder in the distance. The unmistakable sound of 3200 horsepower ripping apart a calm sea. The Superboats are coming. **HEAT-WAVE: OFFSHORE SUPERBOAT RACING™** puts you at the helm of a nautical thoroughbred as you compete on a circuit of realistic courses. A fast fleet of computer skippers stands between you and the most prestigious title in all of powerboat racing: **US 1—best in the world.** Buckle your life vest. It's going to be a bumpy ride. **Another Sensational Simulation by Artech Digital Entertainments.**

COMPETE AGAINST COMPUTERIZED CAPTAINS AND MOTHER NATURE. No squalls off Miami—yet. Scout out each challenger's boat, skills and stats—then go kick some sterns. Navigate by compass or landmarks. Cut a wake wrong and you'll end up dog-paddling home.

RACE ON OPEN OCEAN, RIVERS AND THROUGH CITY CANALS. What'll it be, skipper? Capsize a few canoes on the Mississippi or wake up the citizens of Miami? You've got world class race courses to roostertail through—or create and save your own custom course.

Actual game screens from Commodore 64/128 version of the game. Other versions may vary. Licensed from Artech Digital Entertainments, Inc. © 1990 Accolade, Inc. All rights reserved. All product and corporate names are registered trademarks of their respective companies.
