

We have discovered that certain C64 copy programs, when used to copy Questron II, will create defective copies that at first appear to be good copies. We suggest you do not make a copy of the Questron II disk but play from the original game disk. If you would like to make a back-up copy, call S.S.I.'s Technical Hotline at (415)964-1200 to get a list of copy programs that work properly with Questron II.
