Rescue on Fractalus!™

© 1985 LFL

© 1985 LFL

You've joined an elite Rescue Squadron, flying to the hostile planet Fractalus™ to confront the ruthless enemy Jaggies™ head on. The mission is to rescue Ethercorps™ pilots shot down and stranded on that brutal planet and help lead our forces to victory... for the merciless Jaggi™ onslaught must be stopped to preserve the future of the galaxy.

Sounds easy, but don't let it fool you. It's tough enough to navigate the mountains and canyons of Fractalus, try doing it while destroying enemy gun emplacements or dodging suicide saucers. Don't waste any time—the pilots won't last long in the poisonous cyanitric acid atmosphere of Fractalus.

Don't try to memorize the three-dimensional landscape, because it changes every time you play the game. As if that's not enough, the better you get the harder the game becomes. There's even instrument-only night flying in the more advanced levels.

Rescue on Fractalus!... you've never faced a challenge as tough as this before!

- First-Person Perspective in Both Flying and Rescue Sequences
- Realistic Three-Dimensional Landscape
- Increasing Difficulty Levels
- Joystick Controlled
- One Player

RATING:

Rescue on Fractalus! was created by the Lucasfilm Games Division: The game was designed and programmed by David Fox (Project Leader), Loren Carpenter (Lucasfilm Computer Graphics Project), Charlie Kellner, Peter Langston (Games Group Leader). Contributions and support by Gary Winnick, David Levine, James St. Louis, and Douglas Crockford. Special thanks to George Lucas.

EPYX CODING To help you choose the game that's right for you, EPYX games are coded to indicate the degree of emphasis on "Action," "Strategy," or "Learning." These symbols will appear on the front of all EPYX packages.
