David and Richard Darling first started writing computer games when they were in their early teens and still at school. They duplicated the cassettes themselves and sold them by mail order, taking small advertisements in magazines.

From these beginnings David and Richard became contract programmers. They wrote and sourced games for major software houses, and many of these games were major best sellers.

In October of 1986 the Darlings set up CodeMasters, their own company. From the beginning they were determined to sell only the best possible games, at the lowest possible prices. One title, BMX SIMULATOR, went on to become one of the worlds best selling games.

In less than a year, Codemasters had a string of Top Ten hits to its name. The company was the best selling software house in Britain. David and Richard are now 21 and 20 years old, and are determined to continue what they do best; producing top selling computer games.
