CHRISTMAS DINNER MENU

Santa is controlled by a **JOYSTICK** connected to the relevant port on the Commodore 64/128 computer. Once the game has loaded, pressing **FIRE** puts you in Santa's Sleigh with Rudolph to guide you over the following landscapes:

LAPLAND

Leave Santa's hideout and fly over the freezing snow and ice in an attempt to get to the children's houses all over the World. However, the naughty pixies are out to ensure that your plans to save Christmas will fail, and have gathered lots of spare presents to throw at you to stop your progress.

ATLANTIC OCEAN

Santa's short cut takes him through the centre of a huge iceberg, where he must avoid the large ice flows. Although Santa has had plenty of experience at this tricky operation, he didn't have to also contend with a barrage of un-wanted presents.

PRESENT DELIVERING

At last!! This is what Christmas is all about - flying over the rooftops delivering presents on Christmas morning whilst the children are asleep in their beds. Avoiding chimneys, aerials, last year's presents, pixies, etc., etc., this will test your Santa skills to the limit.

To help you get all of the flying presents out of the way of your sleigh, you can throw a mixture of presents from out of your own sack. A direct hit smashes the pixies' presents to pieces.

However, the troublesome pixies have a master weapon.... They know how much Santa loves Plum Pudding, so they have made bombs that look like Santa's favourite Christmas treat. A few presents have to be blasted at these bombs to get rid of them.

You only have six chances to keep Santa alive in the hearts of the little children. Failure will mean that the pixies will be free to cause trouble all year long, as they will no longer have to make Christmas presents for Santa.

You are Santa - you must make sure that the "little people's" capers do not spoil Christmas for the rest of the World.
