SAVE NEW YORK™

by Joe Jetson

SPACE MUTANTS BITE THE BIG APPLE!

City-munching monsters from outer space have dropped onto New York City! And these turkeys are literally gobbling it up!

To save the Big Apple, you must fly around in your trusty rocket ship and shoot down these creatures with your laser cannon. But beware! If you run into these mutants or into buildings or run out of fuel, you can kiss your hero days — and New York City — goodbye.

As if all this weren't bad enough, our unfriendly visitors can also lay eggs

that drop to the ground. These turn into baby mutants that crawl into the subway system and proceed to eat the buildings from the ground up! To destroy these "babies," you must land your ship and track them down on foot.

For up to two players, this exciting and colorful game has increasing levels of difficulty to keep you always hopping. But if the task seems a bit too much at times, just remember...only **you** can save New York!
