SKATE CRAZY

SKATE CRAZY

SKATE CRAZY — Freddy's the name and roller skating's the game and as every streetwise kid knows the only way to succeed is to gain "Street Cred" from your friends and onlookers.

Freddy must buzz around on his skates performing daredevil stunts. Points are given for successful manoeuvres but the all important **CREDOMETER** is only hoisted upwards by achieving suitably "cred" feats. Keep an eye on the **OUCHMETER** though, as this measures your grazes and bumps, and naturally leads to a loss of Cred.

SKATE CRAZY is made up of two separate, but interfacing games — the **CAR PARK CHALLENGE** and the **CHAMPIONSHIP COURSE**. Unlike ordinary computer games you may pass from one to the other without losing your score or level.

Features superb animation and smoothly scrolling graphics in an "awesomely addictive game" — a must for the "credible gamesplayer".

Joystick required.
