Frank Gasking

Hi Frank,

Please find enclosed the 2 disks, hopefully still containing the C64 version of Solar Jetman. I'm crossing everything so that you retrieve the data ok. I'd love to see it up and running as it's been such a long time, I don't remember much of it. The only thing I can remember is that it's like thrust. Mind you, you can easily just look at the NES version that was released, it got very good reviews.

I did the graphics for this and the spectrum version in a rushed amount of time. I was working from home and did the graphics in a very short period of time. I also chipped in with some Amiga/ST stuff if I remember rightly. I'm sure my old mate John Buckley would love to see it up and running to.

Anyway pal, it's all down to you...no pressure. Let's all hope everything's cool!

All the best,

A handwritten signature in dark ink, appearing to be 'Haydn', with a stylized, cursive script.
