Home Computers with **48k**

SPY vs SPY

by MIKE RIEDEL

Above, players appear in separate rooms. The black Spy sets a "gun with a string to the trigger" booby-trap. Meanwhile, the white Spy places a bomb in a safe behind the painting.

If both spies enter the same room, the Simulvision™, split-screen action is replaced as both players choose to either club it out or continue to set traps and search throughout the maze of rooms.

PROGRAM FEATURES

Simulvision™ - both players active at the same time • Real Time Animations - you control your Spy's every action • One-on-One Combat • Booby-Trap Calculator • Superb Graphics and Sound Effects • One or two players • Joystick and 48K required
