War! Gir Draxon, Supreme Overlord of the Arcturan Empire, has declared war on the Terran Empire, prompting Earth's leaders to dispatch the entire Terran Fleet to intercept the Arcturan Armada.

With the fleet halfway to Arcturus, Terran Intelligence discovered the existence of the Warlink, a phenomenon permitting the transfer of matter from one spot to another. Gir Draxon was transporting an entire ground assault force to Titan, Saturn's largest satellite, as the prelude to a massive invasion of the now-unprotected Earth.

Earth's only remaining hope is the RAVEN, an experimental armored vehicle equipped with anti-grav pods, an invisio-cloak, and heavy weaponry. You must pilot the craft through the seven warplinks from Arcturus to Titan, destroying the guardposts on the way, in order to clear a path for the return of Earth's forces. A suicide mission? Or Earth's only hope?
