There are different aggressive moves available on each stage, and since half the fun is finding the new moves and which is the best one to use on each stage, these moves will not be detailed here. The general layout of the joystick control for these moves is diagrammed below...

Note that instead of left/right on the diagram above, the directions are labelled forward/back. This is because the move selected changes according to which direction the player on the screen is facing. Thus, to get HIT 3 (which is a head butt on stage 1), press the FIRE button and pull the joystick in

the direction the player is facing. This will be to the right if the player is facing to the right and to the left if the player is facing to the left.

CONTROLS

Options screen. The menu displays current options.

F1 start stage, initially you may start on stages 1, 2 or 3. If you reach the higher stages you may then restart the game on any stage up to 7.

F3 taggles numebr of players.

F5 toggles between keyboard, one joystick and two joystick options.

F7 or FIRE starts the game.

Plug the joystick into Port 2, if you use two joysticks then Player One uses the stick in Port 2 and Player Two uses the stick in Port 1.
