- POW MISSION
- GULF OF TERROR
- BERMUDA TRIANGLE
- ARCTIC RESCUE
- OIL BLAZE

# **SUPER HUEY II**

## HELICOPTER FLIGHT SIMULATOR

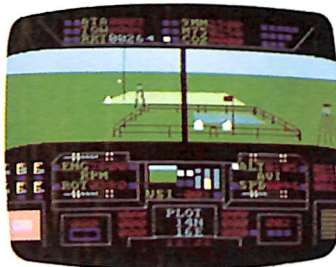

Created by Paul Norman

- Can you stand the thrill and excitement of flying the world's #1 helicopter flight simulator on six furious and challenging missions?
- Can you handle the "TOP GUN" pressure and danger of being "locked-on" by a hostile laser-guided weapons system while you frantically employ every evasive maneuver that's in the book? (And probably some that aren't!)
- Can you face the frightening possibility that any cloud might hide an enemy "chopper" waiting to attack you? All this and more await you in the new cockpit of SUPER HUEY II.

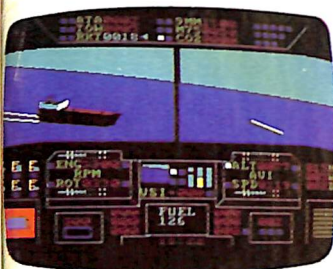

• **COMBAT** – Arcade-style action and excitement bring chilling realism to this dramatic combat scenario where you battle a ruthless enemy in an all-out war of courage and daring. Test your reflexes and your flying

skills in a deadly hi-tech game of "laser tag"!

• **POW MISSION** – Intelligence sources have revealed the location of the enemy camp where our POW's are being held. Your mission: Neutralize the guards and defenses;

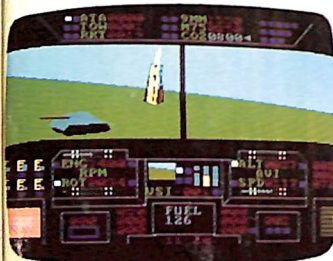

land and free the prisoners.

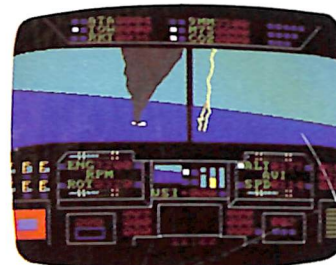

• **GULF of TERROR** – Super Huey II is on carrier duty to battle terrorist gunships and submarines in the Persian Gulf.

• **ARCTIC RESCUE** – A blizzard has stopped communication with a Research Station near the Pole. SUPER HUEY II must undergo the most harsh conditions to save lives.

• **OIL BLAZE** – A refinery is seized and set ablaze. Stop the saboteurs, airlift the workers, and put the fire out before the whole thing blows!

• **BERMUDA TRIANGLE** – The mission is weather reconnaissance, but in the Bermuda Triangle, anything can happen!

Part No.: IBM-222
