Tobruk

A Tank Simulation/
War Strategy Game

THE CLASH OF ARMOUR™

It's June 1942 and the Allies (British, S. African, Free French, New Zealand, and Australian) have almost kicked the Italians and Germans out of North Africa.

Enter Rommel! And the tide turns.

Only Tobruk stands in the way of complete Axis victory; it must be defended against the reinforced enemy thrust. If this key port is captured, Allied supplies will be cut off, Egypt will fall, and the Mediterranean will be at the mercy of Axis warships.

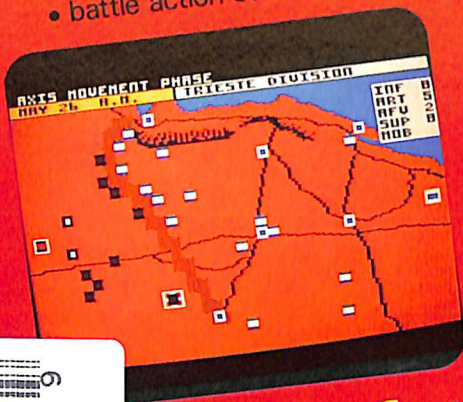

Sand-pounding tank battles and red-skyed desert-dogfights decide the outcome. You can control the action from tactical maps or participate directly in land and air battles.

Get a turret-eye-view of the action with combat-driving simulator, main gun and machine gun controls, mine layer and lifter, and more! Air tactics include ground attacks, air-to-air skirmishes, and long-range bombing.

Strategic phases include Engineering, Re-supplying, and Sabotage phases! Your field map shows air and armoured movements as you command 10 crack divisions of Rommel's Afrika Korps against the computer. Will Tobruk fall again?

FEATURES:

- tank simulation
- war simulation—strategy game
- one or two players
- battle action screens
