SHANGHAI WARRIORS

Mercenaries led by the evil 'Snide Gantree' have stolen a US NAVY Submarine, threatening to launch its awesome arsenal of nuclear destruction warheads on Washington and London.

Attempts by the combined forces of M15 and CIA to destroy the sub have failed.

The governments concerned have taken the only course of action left open to them, send in the latest graduates of the 'DRAGON TEMPLE' Karate Academy.

A sabotage mission set against 3 massive levels of arcade style scrolling action.

JOE BLADE II

Yes he's back in
the long awaited
sequel to
the classic
JOE BLADE.

The year is 1995.
The setting London.
The streets are
filled with punks
and muggers.
Ordinary citizens
are held prisoner
in their own
homes, too
frightened to
venture outside.

F14 TOMCAT COMMODORE LOADING INSTRUCTIONS

Set up your computer as shown in your user manual. Carefully place your F14 TOMCAT tape in the cassette player, ensure that it is rewound. If you are using a Commodore 64 or 64C computer hold down the SHIFT key then tap the RUN/STOP, key then press play on the tape deck. If you are using a 128 first ensure that it is in C64 mode.

F14 TOMCAT

In the later part of the 20th century Grumman's F14 TOMCAT represented the US Navys most potent fighter. F14 TOMCAT from players places you in the cockpit of a specially adapted version of this devastating fighter plane.

The standard F14+2d (PLAYERS AIR FORCE ISSUE), is equipped with a single forward mounted high-power machine gun. By flying very low over specially constructed weapon bases the F14+2d can be fitted with custom built magno-weapons. These are bolted to the fighter in mid flight.

THE MISSION

In the first half of the 21st Century, it became possible through advances in material technology to construct permanent artificial islands very cheaply. Due to the spiralling cost of real-estate many of these islands were built. It is one of these artificial islands that is presently cause for concern.

The island, locally known as ARTROCK 6, is a local defence installation and is completely automated. A freak storm, damaged the controlling software and as a result, the island has turned rogue.

Despite the substantial dollar value attached to the installation, a few regrettable incidents involving local shipping have forced us to destroy the island.

This task has fallen to you, the best low level pilot in the free world. Using a specially adapted F14 TOMCAT fighter with advanced terrain following radar and a special complement of weaponry, you must destroy the island. Extra weaponry may be requisitioned.

CONTROLS

Use a joystick in port 2.
