

Tony La Russa's **ULTIMATE BASEBALL®**

Loading the Expansion Disk Teams: Start Tony LaRussa's Ultimate Baseball as usual. As soon as the credits are displayed on-screen, replace your TLRUB Game Disk with your Expansion Disk. You must complete this exchange before the copy protection screen is shown. Answer the copy protection question (the Expansion Disk is still in the disk drive) and select the two teams you wish to play against one another. When you reach the Ground Rules Screen, you must remove the Expansion Disk and replace it with the TLRUB Game Disk. Now you are ready to play!

Game Over: If you wish to play more games with your Expansion Disk teams, you must replace the TLRUB Game Disk with the Expansion disk when the line score is being displayed after the game is over. If you do not exchange disks, the program will present the preset historical teams. **IMPORTANT:** When the Ground Rules screen is displayed, remember to replace the Expansion Disk with the TLRUB Game Disk.
