COMMODORE 64 LOADING INSTRUCTIONS

Joystick

The joystick should be plugged into Port 2.

Cassette

Turn on the computer power switch.

Place the game cassette in the cassette player with the label side up, and make sure it is rewound to the beginning. Hold down [SHIFT] on the computer keyboard, press the [RUN/STOP] key, and then release both keys. Press the [Play] button on the cassette player. When the screen reads "Found," push the [Commodore] key.

If you have any trouble loading, simply flip the cassette over, rewind, and repeat the loading procedure.

For the Commodore 64 (disk & cassette) and joystick

Now you can play one of the most challenging arcade games at home on your Commodore 64 computer. ZAXXON's incredible 3-D graphics, diagonally scrolling screen and super sound are reproduced in great detail. Everything you love about the arcade game is here, so hang on to your joystick and keep practicing. Eventually you'll be ready to meet the deadly ZAXXON face-to-face.

TM

Disk

Turn on the computer power switch.

Turn on the disk drive and wait for the "Busy" light to go out. Insert the game disk with the label side up and the open end facing the rear of the disk drive. When the monitor screen is lit,

Type: LOAD "*",8,1
Press: [RETURN]

When the initial segment has loaded, the first screen is a menu that allows you to choose either ZAXXON or a collection of Synapse demos. Simply press [1] for the game, or [2] for a menu of the demos. The game program will load in a couple of minutes. If it doesn't, simply flip the disk over and load the other side. The program has been duplicated on both sides.

FUNCTIONS

Player Selection

Press [F5] while the SYNAPSE logo is on the screen to switch from one to two players. Both players will share the same joystick and alternate turns.

To Start Playing

Press [F7] to start the game.

To Pause Play

Press [F7] to pause the game. Any movement of the joystick will resume play.

OBJECT OF THE GAME

ZAXXON is a classic space encounter in which you find yourself at the controls of an attack shuttle spacecraft. You must strafe the enemy Asteroid City in an attempt to destroy fuel tanks, gun emplacements, missiles, and enemy aircraft. With the aid of an altimeter you must barnstorm your way through narrow wall openings, lethal electronic barriers, and deadly rocket fire. A successful attack-run across the Asteroid City leads you to a deep space dogfight with squadrons of enemy planes. Surviving the perils of outer space brings you to another Asteroid City and a showdown with the insidious robot, ZAXXON.

Successfully destroying the evil ZAXXON allows further play but with increased difficulty. The game continues until all of your ships have crashed or been lost to enemy fire.

The Shuttlecraft

Your ship is controlled in the normal aircraft manner. Pull back on the stick to climb, push forward to dive. Left and right turns are made by moving the stick to the left or right, and the trigger button fires your laser cannons. An altimeter on the left hand side of the screen helps you to determine your altitude. This is especially helpful when navigating through the wall openings and electronic barriers, as well as in deep space dogfights. The fuel gauge indicates fuel remaining, which is replenished by destroying the fuel depots in the Asteroid Cities.

Electronic Barriers

In the early levels of play, you must fly over the walls and under or over the deadly electronic barriers erected to protect the Asteroid City. As play progresses, the walls become more impenetrable, leaving only small openings to pass through. These openings are also protected by electronic barriers, so your task is doubly difficult. Fire your lasers at the electronic barriers to gauge your position in relation to the openings.

The Asteroid Cities

At the beginning of your mission you enter the first Asteroid City. You must successfully make your way through the city and destroy as many enemy aircraft as possible. The higher your tally here, the fewer aircraft you will encounter in deep space. You should also destroy the fuel depots to increase your own supply of fuel and also score points. Finally, you should destroy as many radar towers, gun emplacements, and base missiles for the highest possible score.

WARRANTY

SYNAPSE warrants to the original consumer/purchaser that this SYNAPSE program cassette/diskette (not including the computer programs) shall be free from any defects in material or workmanship for a period of 90 days from the date of purchase. If a defect is discovered during this 90 day warranty period, and you have timely validated this warranty, SYNAPSE will repair or replace the cassette or disk at SYNAPSE's option, provided the cassette or disk and proof of purchase is delivered or mailed, postage prepaid, to SYNAPSE.

This warranty shall not apply if the cassette or disk (1) has been misused or shows signs of excessive wear, (2) has been damaged by playback equipment, or (3) if the purchaser causes or permits the cassette or disk to be serviced or modified by anyone other than SYNAPSE. Any applicable implied warranties, including warranties of merchantability and fitness, are hereby limited to 90 days from the date of purchase. Consequential or incidental damages resulting from a breach of any applicable express or implied warranties are hereby excluded.

NOTICE

All SYNAPSE computer programs are distributed on an "as is" basis without warranty of any kind. The entire risk as to the quality and performance of such programs is with the purchaser. Should the programs prove defective following their purchase, the purchaser and not the manufacturer, distributor, or retailer assumes the entire cost of all necessary servicing or repair.

SYNAPSE shall have no liability or responsibility to a purchaser, customer or any other person or entity with respect to any liability, loss or damage caused or alleged to be caused directly or indirectly by computer programs sold through SYNAPSE. This includes but is not limited to any interruption of service, loss of business or anticipatory profits or consequential damages resulting from the use or operation of such computer programs.

The provisions of the foregoing warranty are subject to the laws of the state in which the cassette or disk is purchased. Such laws may broaden the warranty protection available to the purchaser of the cassette or disk.

Deep Space

Successfully negotiating the perils of the Asteroid City leads to deep space and encounters with those enemy aircraft that survived your earlier onslaught, as well as enemy tracking satellites. The size of the aircraft indicates their altitude. (Smaller planes are not as high.) The number of enemy planes (EP) remaining is displayed in the upper right hand corner of the screen. When all enemy planes have been destroyed a bonus of 1000 points is awarded.

The Confrontation

Your flight through the perils of deep space will, if successful, bring you to yet another Asteroid City. But this one is different! It is the fortress of ZAXXON, the deadly robot who will appear launching seeker-missiles. Destruction of the robot requires three direct hits on its missile launcher. After you conquer ZAXXON, the round advances and the difficulty increases. If you lose your ship inside an Asteroid City your next ship will be launched at the beginning of that city. The gameplay ends with the loss of your last ship. An additional ship is awarded for scoring 20,000 points.

SCORING

Radar Towers	1000
Fuel Tanks	300
Gun Emplacements	200 or 500 (random)
Base Missiles	150
Enemy Planes	100 (increases by 50 each round)
Satellites	300
Robot Missiles	200
ZAXXON	1000
