## **PALLET**

- Top and bottom deck
- More in demand
- Typical size 48" x 40"
- More stable
- More friction (harder to drag)
- More convenient for racking
- Can carry up to 1000kg
- Easily hauled by a forklift truck

## **SKID (noun)**

- No bottom deck
- Less friction (easier to drag)
- The oldest type of pallet
- Because it's mobile, often used as a permanent foundation for heavy machinery
- A cheap version of pallets
- Takes up less space when nested

# A skid looks like a pallet.
