"Did the Chicken Cross the Road?"

Allen thought of his chickens as his children. He named each one of his dozen chickens.

One day a chicken named Glen was missing. Allen had 11 chickens.

The following day another chicken, Carmen, disappeared. Allen was down to 10 chickens. Today, he could not find Henry, Ken and Jenny. Only 7 chickens remained.

Allen thought aloud, "Maybe the chickens had driven with a kitten to the North Pole to become frozen chickens! Then again, neither chickens nor kittens can drive."

Be a good citizen. Write a story about what you think happened to Allen's chickens. I may give the best story writer a penny.

#11 en Advanced "Did the Chicken Cross the Road?"

1) How many chickens did Allen start with?

2) What was the name of the first chicken missing? _____

3) If Allen had twelve chickens and seven were left, how many were missing?

4) Where did Allen think the chickens went with the kitten? _____

5) Please underline all the nouns once, the verbs twice and circle every adjective.
