Advanced "Eating a Chicken Wing is Just as Demanding"

Why is ping-pong an Olympic event?

A traditional sport like boxing has historical importance and is physically demanding.

Training everyday with good eating habits is a tough way to make a living. Also, a person must be brave to step in a ring and allow another take a swing at your head.

I can tolerate sports like running or swimming; however, I can play ping-pong while eating a chicken wing.

I am not overreacting by saying ping-pong should not be in the Olympics.

Do you think ping-pong should be an Olympic event?
