"Capture the Moment with a Picture"

I like to observe nature and its creatures. One morning, I ventured in a pasture. I think I saw a vulture. I had to capture the moment with a picture.

The next day, my teacher gave a lecture on birds. I showed her the picture. She looked closely at the texture on the feathers.

My teacher informed me, "After observing the features, it's a vulture. To be more precise, a mature condor."

What bird would you want to be for a day?
