

#152 **tion** Advanced

"A Standing Ovation"

A student asked a question,
"When will we learn fractions?"
I mentioned, "After I teach addition,
subtraction, multiplication and
division."

A section of the class was more
than satisfied with my explanation.
They gave me a standing ovation.

It was a loud eruption!

The reaction to the situation
surprised me. If they have that much
motivation for education, let them
have their celebration.
